Comments

I was not aware that there is a student liaison. More opportunities and emails informing students of these opportunities can help students

I am currently in school in the United States and have not received any emails from the student liaison while here.

Provide better stances on care/treatments and materials publicly (on website) similar to ADA (ex public stance on evidence of silver amalgam or other materials) also so similar to ONA (nurses association) more advocacy for what paediatric dentistry is/provides and lastly a unified stance against operator anesthesia (deep/general anesthesia)

Be more interactive with graduate student members, post opportunities for outreach where we can help with outreach programs in our communities

Consider providing an intro-email to new student members that outlines what CAPD/ACDP has to offer for students. I was unaware of a lot of the things that CAPD had to offer! If this email is already occurring, then perhaps I missed it!
